

By automating employee-manager communications, reducing scheduling errors, managing the processes around collecting availability, open shift, shift trades and vacation management, ShiftPlanning relieves managers of valuable time that can be spent on mission critical tasks. Given the affordability of the platform, companies are seeing 5x return and more on their investment in ShiftPlanning.

According to a CCH Unscheduled Absence Survey, each year "employee absenteeism costs organizations an average of \$660 per employee.

A 2010 Axsium Group survey found large companies save \$1600 per employee, an average, after implementing a workforce management solution.

A RSAG Benchmark Report found that 36% of Retailers spend five hours or more per week on workforce management.

A Recent Watson Wyatt Employee Communication ROI Study found companies with high levels of communication effectiveness were 20% more likely to report lower turnover rates than their competitors.
